## Relevant Experience

### Frontend developer, Temantrip

february - may 2023

- working as an intern at a startup, where i have been involved in various projects ranging from building responsive web pages to developing new features for existing applications. this experience has allowed me to working with modern web technologies and has honed my skills in problem-solving and collaboration.
- collaborate with ui/ux, back-end developer and other to transform crative concepts into production realities for clients.

### Frontend developer, Electrindo inti dinamika

may- july 2023

- i have been involved in various projects ranging from building responsive web pages to developing new features for existing applications. this experience has allowed me to working with modern web technologies and has honed my skills in problem-solving and collaboration.
- collaborate with ui/ux, back-end developer and other to transform crative concepts into production realities for clients.

### Front-End Developer, Deborahtech

Jully 2023

- I have experience working as a freelance web developer, where I helped clients turn their designs from Figma into fully functional websites. This experience has taught me the importance of attention to detail and the ability to work closely with clients to ensure their vision is realized.

## Selected Project

### Neovim Configuration

I have optimized for fast startup times. I have added snippets similliar to those found in VSCode. this setup is perfect for frontend development and has streamlined my workflow by providing a comortable and efficient environment for coding

### Movie App

Built with ReactJS, and Tanstack's powerful fetching capabilities. With this app, you'll be able to search for movies by title, see detail for movie.

### Portofolio

Personal website built with Next.js 13, I've improve performance, accessibillity and SEO up to 100%, already write in typescript with 20 stars 4 forks

### Dashboard App

A Dashboard app create with nextjs13 app dir, this dashboard include a tanstack For fetching management, using zustand for state managemnt global and last not least Im added jwt for auth login user for better security

## Skills

### Progaming Languages

HTML, CSS, JavaScript, Typescript

### Libraries & Frameworks

React, Next.js, Tailwind

### Tools & Flatoforms

Git, Github, Netlify, Vercel, Firebase, Figma, Neovim, Linux

## Interest

I really like to custome my Neovim, Read books, and listening music
